

Members of the FCC

Please do not limit the services that are and can be provided by satellite radio. Is not competition the characteristic of a free market society? It is not morally or ethically proper in this country to limit the possibilities of legitimate commercial enterprises. Do not let the money, power, and influence of established stagnate companies limit the potential for growth and progress in our economy.

Do not limit the ability of satellite radio to provide weather and traffic reports to their subscribing customers.

Thank you.

Jeff Mathis

XM Satellite subscriber and supporter of the Constitution, Bill of Rights, and a free market society.
